

## **Why were Police and Paramedics sent to my home this evening?**

At 5:00PM this evening (Saturday 12th June 2010) I was at home, by myself, when the door bell rang and I opened the main door to see about five Police Officers on my verandah. I asked why were they here ... and all they would say was "Are you John Wilson?". I said "You've got no reason to be here and you are trespassing. Leave my property." This is because the Police have trespassed many times, already..... as I have testified to.

They said they had had a report by means of a texted message from me that I was "suicidal" and "intended to harm myself". I denied sending any such thing and demanded to know who had. They said they didn't know. I said, "You can't act on a report without knowing who it is that made the report." They still insisted that it was me and the message had come from my phone. I, again, denied it.

Then a couple of Paramedics came down my driveway. They said they had come to check out that I was all right and they wanted to take me away for a psychiatric assessment. I phoned a friend to tell him of what was happening and he confirmed that it was all rubbish.

At first, I locked the screen door because of the previous incidents when Castle Hill Police had trespassed and assaulted me and arrested me without even a Warrant... and saying, as they violently attacked my door with a steel bar, "We don't need a Warrant.e're the Police" ... all this was brought out in the District Court over the last couple of weeks.

This time, again, they threatened to break the door down, and kept on saying they just wanted to make sure I was okay. So, I opened the screen door and went onto the verandah to talk to them. When I told them it was just another attempt to harrass me and started to explain that I have been fighting the Banks and the Judges for many years, I think they might have begun to realize that the phone message was a hoax.

The female Police Officer wanted to know the number of my mobile...and I told her .... perhaps she will investigate the hoax call and see what number had really sent it.... I suspect whoever it was gave my name.

As they were all leaving and they said they would make a report of being sent to my home, I said, "I want a copy of that report" .... to which they said I could not have .... and I said "I'll get it through the Freedom of Information Act."
